INDEPENDENT AUDITOR'S REPORT

The Board of Directors
Hospital Authority of Clinch County
Homerville, Georgia

Report on the Financial Statements

We have audited the accompanying financial statements of Hospital Authority of Clinch County, Georgia (Authority), which comprise the balance sheets as of June 30, 2020 and 2019, and the related statements of revenues, expenses and changes in net position, and cash flows for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Authority's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Authority's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Continued

1

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Hospital Authority of Clinch County, Georgia as of June 30, 2020 and 2019, and the changes in its financial position and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Required Supplementary Information

Management has omitted the Management's Discussion and Analysis that accounting principles generally accepted in the United States of America require to be presented to supplement the basic financial statements. Such missing information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of the financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. Our opinion on the basic financial statements is not affected by this missing information.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated February 19, 2021, on our consideration of the Authority's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Authority's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Authority's internal control over financial reporting and compliance.

Draffin & Tucker, LLP

Albany, Georgia February 19, 2021

BALANCE SHEETS June 30, 2020 and 2019

ASSETS	2020	<u>2019</u>

Supplemental disclosure of cash flow information:

• The Authority entered into capital lease obligations of approximately \$215,000 and \$71,000 for new equipment in 2020 and 2019, respectively.

NOTES TO FINANCIAL STATEMENTS June 30, 2020 and 2019

1. <u>Description of Reporting Entity and Summary of Significant Accounting Policies</u>

Reporting Entity

The Hospital Authority of Clinch County (Authority) is a public corporation which operates Clinch Memorial Hospital, a 25 bed Critical Access Hospital. The Authority is comprised of a Board of Directors, which has the right to approve major expenditures and long-term borrowings.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Significant items subject to such estimates and assumptions include the determination of the allowances for uncollectible accounts and contractual adjustments, estimated third-party payor settlements, and self-insurance reserves. In particular, laws and regulations governing the Medicare and Medicaid programs are extremely complex and subject to interpretation. As a result, there is at least a reasonable possibility that recorded estimates associated with these programs will change by a material amount in the near term.

Enterprise Fund Accounting

The Authority uses enterprise fund accounting. Revenues and expenses are recognized on the accrual basis using the economic resources measurement focus.

The Authority prepares its financial statements as a business-type activity in conformity with applicable pronouncements of the Governmental Accounting Standards Board (GASB).

Cash and Cash Equivalents

Cash and cash equivalents include investments in highly liquid debt instruments with an original maturity of three months or less.

Investments

Investments include certificates of deposit recorded at cost which approximate fair market value.

Allowance for Doubtful Accounts

The Authority provides an allowance for doubtful accounts based on the evaluation of the overall collectability of the accounts receivable. As accounts are known to be uncollectible, the account is charged against the allowance.

NOTES TO FINANCIAL STATEMENTS, Continued June 30, 2020 and 2019

1. <u>Description of Reporting Entity and Summary of Significant Accounting Policies, Continued</u>

Risk Management

The Authority is exposed to various risks of loss from torts; theft of, damage to, and destruction of assets; business interruption; errors and omissions; employee injuries and illnesses; natural disasters; and employee health and accident benefits. Commercial insurance coverage, with the exception of employee health and accident benefits, is purchased for claims arising from such matters. Settled claims did not exceed commercial coverage in any of the three preceding years.

Impairment of Long-Lived Assets

The Authority evaluates on an ongoing basis the recoverability of its assets for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. The impairment loss to be recognized is the amount by which the carrying value of the long-lived asset exceeds the asset's fair value. In most instances, the fair value is determined by discounted estimated future cash flows using an appropriate interest rate. The Authority has not recorded any impairment charges in the accompanying statements of revenues, expenses and changes in net position for the years ended June 30, 2020 and 2019.

Noncurrent Cash and Investments

Noncurrent cash and investments include assets restricted for the USDA loan reserve fund.

Grants and Contributions

From time to time, the Authority receives grants from Clinch County and the State of Georgia as well as contributions from individuals and private organizations. Revenues from grants and contributions (including contributions of capital assets) are recognized when all eligibility requirements, including time requirements are met. Grants and contributions may be restricted for either specific operating purposes or for capital purposes. Amounts that are unrestricted or that are restricted to a specific operating purpose are reported as nonoperating revenues. Amounts restricted to capital acquisitions are reported after nonoperating revenues and expenses.

Restricted Resources

When the Authority has both restricted and unrestricted resources available to finance a particular program, it is the Authority's policy to use restricted resources before unrestricted resources.

Capital Assets

The Authority's capital assets are reported at historical cost. Contributed capital assets are reported at their acquisition value at the time of their donation. Depreciation is provided over the estimated useful life of each depreciable asset and is computed using the straight-line method. The estimated useful life is assigned using AHA Useful Lives Guidelines listed below.

NOTES TO FINANCIAL STATEMENTS, Continued June 30, 2020 and 2019

1. <u>Description of Reporting Entity and Summary of Significant Accounting Policies, Continued</u>

Capital Assets, Continued

Equipment under capital lease obligations is amortized on the straight-line method over the shorter period of the lease term or the estimated useful life of the equipment. Such amortization is included in depreciation and amortization in the financial statements.

Land improvements 15 To 20 Years Buildings and improvements 20 To 40 Years Equipment 3 To 7 Years

Costs of Borrowing

Interest cost on borrowed funds during the period of construction of capital assets is capitalized as a component of the cost of acquiring those assets.

Unearned Revenue

Unearned revenue arises when assets are recognized before revenue recognition criteria have been satisfied. CARES Act advance payments are reported as unearned revenue until all applicable eligibility requirements are met. See Note 19 for additional information.

Net Position

Net position of the Authority is classified in three components. *Net investment in capital assets* consist of capital assets net of accumulated depreciation and reduced by the current balances of any outstanding borrowings used to finance the purchase or construction of those assets. *Restricted net position* is noncapital net assets that must be used for a particular purpose, as specified by creditors, grantors, or contributors external to the Authority, including amounts deposited with trustees. *Unrestricted net position* is remaining net assets that do not meet the definition of *net investment in capital assets* or *restricted*.

Financing Cost

Costs incurred in connection with the issuance of debt are expensed in the period in which they are incurred.

Operating Revenues and Expenses

The Authority's statement of revenues, expenses and changes in net position distinguishes between operating and nonoperating revenues and expenses. Operating revenues result from exchange transactions associated with providing health care services – the Authority's principal activity. Nonexchange revenues, including taxes, grants, and contributions received for purposes other than capital asset acquisition, are reported as nonoperating revenues. Operating expenses are all expenses incurred to provide health care services, other than financing costs.

NOTES TO FINANCIAL STATEMENTS, Continued June 30, 2020 and 2019

1. <u>Description of Reporting Entity and Summary of Significant Accounting Policies, Continued</u>

Compensated Absences

The Authority's employees earn vacation days at varying rates depending on years of service. Employees may accumulate vacation leave up to 275 hours. Employees also earn sick leave benefits based on varying rates depending on years of service. Employees may accumulate sick leave up to 205 hours. Employees are not paid for accumulated sick leave if they leave before retirement. However, employees who retire from the Authority may convert accumulated sick leave to termination payments at varying rates, depending on the employee's contract. The estimated amount of compensated absences is reported as a current liability in both 2020 and 2019.

Net Patient Service Revenue

The Authority has agreements with third-party payors that provide for payments to the Authority at amounts different from its established rates. Payment arrangements include prospectively determined rates per discharge, reimbursed costs, discounted charges, and per diem payments. Net patient service revenue is reported at the estimated net realizable amounts from patients, third-party payors, and others for services rendered, including estimated retroactive adjustments under reimbursement agreements with third-party payors. Retroactive adjustments are accrued on an estimated basis in the period the related services are rendered and adjusted in future periods as final settlements are determined.

Charity Care

The Authority provides care to patients who meet certain criteria under its charity care policy without charge or at amounts less than its established rates. Because the Authority does not pursue collection of amounts determined to qualify as charity care, they are not reported as revenues.

Income Taxes

The Authority is a governmental entity and is exempt from income taxes. Accordingly, no provision for income taxes has been considered in the accompanying financial statements.

Fair Value Measurements

GASB Statement No. 72 – Fair Value Measurement and Application defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value is an exit price at the measurement date from the perspective of a market participant that controls the asset or is obligated for the liability. GASB No. 72 also establishes a hierarchy of inputs to valuation techniques used to measure fair value. If a price for an identical asset or liability is not

NOTES TO FINANCIAL STATEMENTS, Continued June 30, 2020 and 2019

1. <u>Description of Reporting Entity and Summary of Significant Accounting Policies, Continued</u>

Fair Value Measurements, Continued

observable, a government should measure fair value using another valuation technique that maximizes the use of relevant observable inputs and minimizes the use of unobservable inputs. GASB No. 72 describes the following three levels of inputs that may be used:

- Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that a government can access at the measurement date. The fair value hierarchy gives the highest priority to Level 1 inputs.
- Level 2: Observable inputs such as quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, or inputs other than quoted prices that are observable for the asset or liability.
- Level 3: Unobservable inputs for an asset or liability. The fair value hierarchy gives the lowest priority to Level 3 inputs.

Recently Adopted Accounting Pronouncement

In May 2020, the GASB issued Statement No. 95, *Postponement of the Effective Dates of Certain Authoritative Guidance* (GASB 95). GASB 95's primary objective is to provide temporary relief to governments and other stakeholders in light of the COVID-19 pandemic by postponing the effective dates of certain provisions in Statements and Implementation Guides. GASB 95 is effective immediately. Earlier application of provisions is permitted to the extent specified in each pronouncement as originally issued.

2. Net Patient Service Revenue

The Authority has agreements with third-party payors that provide for payments to the Authority at amounts different from its established rates. The Authority does not believe that there are any significant credit risks associated with receivables due from third-party payors.

Revenue from the Medicare and Medicaid programs accounted for approximately 78% and 1%, respectively, of the Authority's net patient revenue for the year ended 2020, and 75% and 1%, respectively, of the Authority's net patient revenue for the year ended 2019. Laws and regulations governing the Medicare and Medicaid programs are extremely complex and subject to interpretation. As a result, there is at least a reasonable possibility that recorded estimates will change by a material amount in the near term.

The Authority believes that it is in compliance with all applicable laws and regulations and is not aware of any pending or threatened investigations involving allegations of potential wrongdoing. However, there has been an increase in regulatory initiatives at the state and federal levels including the initiation of the Recovery Audit Contractor (RAC) program and the Medicaid Integrity Contractor (MIC) program. These programs were created to review

NOTES TO FINANCIAL STATEMENTS, Continued June 30, 2020 and 2019

2. <u>Net Patient Service Revenue, Continued</u>

Medicare and Medicaid claims for medical necessity and coding appropriateness. The RAC's have authority to pursue improper payments with a three year look back from the date the claim was paid. Compliance with such laws and regulations can be subject to future government review and interpretation as well as significant regulatory action including fines, penalties and exclusion from Medicare and Medicaid programs.

A summary of the payment arrangements with major third-party payors follows:

Medicare

Effective July 21, 2000, the Authority was granted Critical Access Hospital (CAH) designation by the Medicare program. The CAH designation places certain restrictions on daily acute care inpatient census and an annual, average length of stay of acute care inpatients. Inpatient acute care and outpatient services rendered to Medicare program beneficiaries are paid based on a cost reimbursement methodology.

The Authority is reimbursed for certain reimbursable items at a tentative rate with final settlement determined after submission of annual cost reports by the Authority and audits thereof by the Medicare Administrative Contractor (MAC). The Authority's classification of patients under the Medicare program and the appropriateness of their admission are subject to an independent review by a peer review organization under contract with the Authority. The Authority's Medicare cost reports have been audited by the MAC through June 30, 2016.

Medicaid

Inpatient acute care services rendered to Medicaid program beneficiaries are paid at a prospectively determined rate per admission. These rates vary according to a patient classification system that is based on clinical, diagnostic and other factors. Outpatient services rendered to Medicaid program beneficiaries are reimbursed under a cost reimbursement methodology.

The Authority is reimbursed at a tentative rate with final settlement determined after submission of annual cost reports by the Authority and audits thereof by the Medicaid fiscal intermediary. The Authority's Medicaid cost reports have been audited by the Medicaid fiscal intermediary through June 30, 2016.

The Authority has also entered into contracts with certain managed care organizations to receive reimbursement for providing services to selected enrolled Medicaid beneficiaries. Payment arrangements with these managed care organizations consist primarily of prospectively determined rates per discharge, discounts from established charges, or prospectively determined per diems.

NOTES TO FINANCIAL STATEMENTS, Continued June 30, 2020 and 2019

2. <u>Net Patient Service Revenue</u>, Continued

Medicaid, Continued

The Authority participates in the Georgia Indigent Care Trust Fund (ICTF) Program. The Authority receives ICTF payments for treating a disproportionate number of Medicaid and other indigent patients. ICTF payments are based on the Authority's estimated uncompensated cost of services to Medicaid and uninsured patients. The amount of ICTF payments recognized in net patient service revenue was approximately \$385,000 and \$336,000 for the years ended June 30, 2020 and 2019, respectively.

The Medicare, Medicaid and SCHIP Benefits Improvement and Protection Act of 2000 (BIPA) provides for payment adjustments to certain facilities based on the Medicaid Upper Payment Limit (UPL). The UPL payment adjustments are based on a measure of the difference between Medicaid payments and the amount that could be paid based on Medicare payment principles. The net amount of UPL payment adjustments recognized in net patient service revenue was approximately \$87,000 and \$79,000 for the years ended June 30, 2020 and 2019, respectively.

Other Arrangements

The Authority has also entered into payment arrangements with certain commercial insurance carriers, health maintenance organizations, and preferred provider organizations. The basis for payment to the Authority under these arrangements includes prospectively determined rates per discharge, discounts from established charges, and prospectively determined daily rates.

3. Uncompensated Services

The Authority was compensated for services at amounts less than its established rates. Charges for uncompensated services for 2020 and 2019 were approximately \$7,193,000 and \$6,116,000, respectively.

Uncompensated care includes charity and indigent care services of approximately \$322,000 and \$373,000 in 2020 and 2019, respectively. The cost of charity and indigent care services provided during 2020 and 2019 was approximately \$259,000 and \$263,000, respectively computed by applying a total cost factor to the charges forgone.

NOTES TO FINANCIAL STATEMENTS, Continued June 30, 2020 and 2019

3. <u>Uncompensated Services, Continued</u>

The following is a summary of uncompensated services and a reconciliation of gross patient charges to net patient service revenue for 2020 and 2019.

	<u>2020</u>	<u>2019</u>
Gross patient charges	\$ <u>18,767,000</u>	\$ <u>17,645,000</u>

Other allowances	944,000	632,000
Bad debts	<u>1,960,000</u>	<u>1,685,000</u>
Total uncompensated care	_7,193,000	6,116,000
Net patient service revenue	\$ <u>11,574,000</u>	\$ <u>11,529,000</u>

4. <u>Deposits and Investments</u>

<u>Custodial Credit Risk – Deposits</u>

Custodial credit risk is the risk that in the event of a bank failure, the Authority's deposits may not be returned to them. The Authority does not have a deposit policy for custodial credit risk. The Authority's bank deposits at June 30, 2020 and 2019 are entirely insured or collateralized with securities held by the pledging financial institutions designated trustee in the Authority's name.

As discussed in Note 1, the Authority's investments approximate fair value. Deposits and investments as of June 30, 2020 and 2019 are classified in the accompanying financial statements as follows:

	<u>2020</u>	<u>2019</u>
Balance sheets: Cash and cash equivalents Short-term investments Noncurrent cash and investments:	\$ 8,509,000 78,000	\$ 2,149,000 59,000
Restricted for reserve fund	830,000	830,000
Total	\$ <u>9,417,000</u>	\$ <u>3,038,000</u>

Depreciation expense for the years ended June 30, 2020 and 2019 amounted to approximately \$559,000 and \$514,000, respectively. Accumulated amortization for equipment under capital lease obligations at June 30, 2020 and 2019 was approximately \$156,000 and \$129,000, respectively.

7. Medicare Accelerated and Advance Payments

The Coronavirus Aid, Relief, and Economic Security Act (CARES Act) expanded the Medicare Accelerated and Advance Payment (MAAP) program to increase cash flow to healthcare providers impacted by the COVID-19 pandemic. In April 2020, the Authority received approximately \$3,162,000 in MAAP payments. The MAAP payments must be repaid and recoupment begins one year after the date of receipt. Medicare will recoup 25% of Medicare payments owed to the Authority for eleven months. Medicare will then recoup 50% of Medicare payments owed to the Authority for the succeeding six months. Any outstanding balance must then be repaid.

NOTES TO FINANCIAL STATEMENTS, Continued June 30, 2020 and 2019

8. <u>Long-Term Debt</u>

A schedule of changes in the Authority's long-term debt for the years ended June 30, 2020 and 2019 follows:

	Balance June 30, 2019	<u>Additions</u>	Reductions	Balance June 30, 2020	Amounts Due Within <u>One Year</u>

NOTES TO FINANCIAL STATEMENTS, Continued June 30, 2020 and 2019

8. <u>Long-Term Debt, Continued</u>

The terms and due dates of the Authority's long-term debt, including capital lease obligations, at June 30, 2020 and 2019 follows:

- 4.125% note payable, USDA loan for construction of new hospital, collateralized by new building and equipment, due February 2037.
- On April 24, 2020, the Authority received loan proceeds in the amount of approximately \$1,131,000 under the Paycheck Protection Program (PPP). The PPP, established as part of the Coronavirus Aid, Relief, and Economic Security Act (CARES Act), provides for loans to qualifying businesses for amounts up to 2.5 times of the average monthly payroll expenses of the qualifying business. The loans and accrued interest are forgivable after the covered period as long as the borrower uses the loan proceeds for eligible purposes, including payroll, benefits, rent and utilities, and maintains its payroll levels. The amount of loan forgiveness will be reduced if the borrower terminates employees or reduces salaries during the covered period. The unforgiven portion of the PPP loan is payable over two years at an interest rate of 1 percent, with a deferral of payments for the first ten months after the covered period. The Authority believes its use of the proceeds is consistent with the PPP and intends to seek forgiveness. PPP loans greater than \$2 million are subject to review by the Small Business Administration. The Authority will recognize any forgiveness of the loan at the time the Authority is legally released from the debt. Subsequent to year end, the Small Business Administration (SBA) approved the forgiveness of the loan.
- 2.750% SBA Disaster Loan 30 year note payable with payments deferred one year from June 2020, due May 2050.
- 7.500% capital lease, DeMott Tractor Co., due February 2019.
- 6.350% capital lease, Mindray DS USA, Inc., due April 2023.
- 0.220% capital lease, Olympus America, Inc., due February 2023.
- 8.837% capital lease, Medivators, Inc., due March 2023.

Under the terms of the USDA note payable, the Authority is required to maintain certain deposits in reserve. Such deposits are included with restricted cash and investments in the balance sheet. All notes payable contain a provision that in an event of default, outstanding amounts may become immediately due and payable.

NOTES TO FINANCIAL STATEMENTS, Continued June 30, 2020 and 2019

8. <u>Long-Term Debt, Continued</u>

Scheduled principal and interest repayments on long-term debt, including capital lease payments, are as follows:

	Long-Term Debt and Capital Leases			
Year Ending June 30	<u>Principal</u> <u>Inte</u>		<u>Interest</u>	
2021 2022 2023 2024 2025 2026-2030 2031-2035 2036-2040 2041-2045 2046-2050	\$	1,080,000 1,105,000 532,000 487,000 507,000 2,872,000 3,523,000 1,350,000 26,000 27,000	\$	425,000 396,000 372,000 352,000 331,000 1,319,000 665,000 57,000 5,000 2,000
Total	\$	11,509,000	\$ 3	3,924,000

9. <u>Health Care Reform</u>

There has been increasing pressure on Congress and some state legislatures to control and reduce the cost of healthcare at the national and the state levels. Legislation has been passed that includes cost controls on healthcare providers, insurance market reforms, delivery system reforms and various individual and business mandates among other provisions. The costs of these provisions are and will be funded in part by reductions in payments by government programs, including Medicare and Medicaid. There can be no assurance that these changes will not adversely affect the Authority.

10. Concentrations of Credit Risk

The Authority grants credit without collateral to its patients, most of whom are local residents and are insured under third-party payor agreements. See Note 5 for the mix of receivables from patients and third-party payors at year end.

11. Malpractice Insurance

The Authority is covered by a claims-made general and professional liability insurance policy with a \$10,000 deductible per incident and excess coverage on a claims-made basis. Liability limits related to this policy in 2020 and 2019 are \$1 million per occurrence and \$3 million in aggregate.

Various claims and assertions may be made against the Authority in its normal course of providing services. In addition, other claims may be asserted arising from services provided to patients in the past. In the opinion of management, adequate provision has been made for losses which may occur from such asserted and unasserted claims that are not covered by liability insurance.

Continued

NOTES TO FINANCIAL STATEMENTS, Continued June 30, 2020 and 2019

12. Retirement Plan

The Authority offers an employee benefit plan created in accordance with Internal Revenue Code Section 403(b) and is administered by MetLife. The plan is available to all employees who have completed one year and more than 1,000 hours of service. The Authority matched contributions of 3% of the employee's salary in 2020 and 2019. Participant's interest in amounts contributed by the participant vest immediately. Participant's interest in amounts contributed by the Authority vest under the plan at rates of 0% under 2 years of service, 25% after 2 years of service, 50% after 3 years of service, 75% after 4 years of service, 100% after 5 or more years of service. Forfeited nonvested accounts may be used by the Authority to reduce the fees associated with the plan. The Authority recognized no forfeitures in pension expense during 2020 or 2019.

The Authority's contributions are invested in accordance with the investment elections made by the participant. The Authority contributed approximately \$135,000 and \$104,000 for the years ended June 30, 2020 and 2019, respectively.

13. Compliance Plan

The healthcare industry has been subjected to increased scrutiny from governmental agencies at both the federal and state level with respect to compliance with regulations. Areas of noncompliance identified at the national level include Medicare and Medicaid, Internal Revenue Service, and other regulations governing the healthcare industry. In addition, the Reform Legislation includes provisions aimed at reducing fraud, waste, and abuse in the healthcare industry. These provisions allocate significant additional resources to federal enforcement agencies and expand the use of private contractors to recover potentially inappropriate Medicare and Medicaid payments. The Authority has implemented a compliance plan focusing on such issues. There can be no assurance that the Authority will not be subjected to future investigations with accompanying monetary damages.

14. County Support

The Authority receives funds from Clinch County, Georgia primarily for operations of the Hospital. Funds received for the years ended June 30, 2020 and 2019 were approximately \$1,506,000 and \$887,000, respectively. In August 2020, the County Commissioners issued a resolution to continue to provide the 4 tax mills for calendar year 2020 taxable property revenues.

15. Rural Hospital Tax Credit Contributions

The State of Georgia (State) passed legislation which will allow individuals or corporations to receive a State tax credit for making a contribution to certain qualified rural hospital organizations during calendar years 2017 through 2024. The Authority submitted the necessary documentation and was approved by the State to participate in the rural hospital tax credit program for 2020 and 2019. Contributions received under the program approximated \$174,000 and \$481,000 during 2020 and 2019, respectively. The Authority will have to be approved by the State to participate in the program in each subsequent year. Amounts received under the program are recorded as unrestricted gifts and bequests in the statements of revenues, expenses, and changes in net position.

Continued

NOTES TO FINANCIAL STATEMENTS, Continued June 30, 2020 and 2019

16. <u>Management Agreement</u>

Effective August 1, 2018, the Authority entered into a Management Services Agreement with the Hospital Authority of Miller County (Miller). Miller will provide Clinch with management services in the form of certain business, operational, quality, and other support. The term of the agreement is for two (2) years and shall automatically renew for one (1) year unless notice of termination is given. The Authority paid approximately \$423,000 in 2020 for management fees.

17. Operational Improvement Plan

The Authority began a thorough strategic direction initiative in 2016, prompted by the Hospital's declining utilization, financial limitations, and limited leverage as a stand-alone, independent rural community hospital. Certain outcomes of these plans are unknown due to the uncertainty in national healthcare reform that is ever changing.

The Authority conducted a complete operational assessment during fiscal year 2016 and has continued to reassess through 2020. They derived from that assessment a highly detailed action plan identifying opportunities for improved operational efficiency, cost savings, and growth in revenue. Due to the effects of the COVID-19 coronavirus, some of the plans have been further modified or delayed.

The following items below outline action points implemented or under consideration:

- (1) In August 2016, the Hospital Authority approached the County Commission requesting additional funding from the County. After several meetings, the Commissioners voted to increase the mills payable to the Hospital from 2.6 to 4.0. The additional 1.4 mills equate to approximately \$300,000, annually. Tax monies received are reported as other operating revenues. The County Commissioners have agreed to provide the 4.0 mills through calendar year 2020. A request must be made annually. See Note 14 for additional information.
- (2) To increase swing-bed volume, the Authority, in August of 2018, partnered with Miller County in Colquitt, Georgia, to provide care for patients that are in need of long-term ventilators and or trachs. The goal is to provide care for an average of 10 swing bed patients per day. The Authority has also increased its ability to admit more swing bed patients to the Hospital by having a Hospital employed physician. As a result of this partnership, the Authority is seeing improved operations from the swing bed program. While the Authority is not quite at the goal of 10 patients per day, they saw an average of 7.5 patients per day in 2020 as compared to 1.25 patients per day in 2018.
- (3) During the 2016 Georgia General Assembly, Senate Bill 258 was passed which will allow an individual or corporation to receive a state tax credit for making a donation to certain qualified rural hospital organizations. In 2017, Senate Bill 180 was passed which enhanced the previously passed Senate Bill 258. The total amount of tax credits available in the State are \$60 million per year through 2024.

NOTES TO FINANCIAL STATEMENTS, Continued June 30, 2020 and 2019

17. Operational Improvement Plan, Continued

For each calendar year of the credit, no more than \$4 million shall be approved for any individual rural hospital organization. See Note 15 for amounts received during fiscal years 2019 and 2020.

The Authority has partnered with Georgia Heart and is pursuing donations through the rural hospital tax credit. The donations received through the credit decreased in 2020, partially attributable to the COVID-19 pandemic. The Authority continues to seek donations through education provided on social media, advertising in local newspapers and by mailing educational boxes to CPA firms in Atlanta and Glynn County. There is no guarantee for these donations.

- (4) The Authority has hired an Internist, Dr. Igor Ancor who started practice in August of 2019, in addition to two other Family Nurse Practitioners. Together, these three providers will see patients in the newly renovated Clinch Memorial Family Practice and provide hospitalist services at the hospital.
- (5) Management has established new service lines at the hospital that include a Medical Stabilization program and have partnered with Miller County Hospital to care for underserved patients on ventilators. The Authority will provide transition care through the swing-bed program until the patient is placed in a nursing facility. There are plans to open a geriatric intensive outpatient program, wellness center, and an outpatient wound care clinic.
- (6) Management has hired a consultant that is assisting them in creating a captive health insurance plan with local industries to generate more business for the hospital in the forms of chronic care management, Occupational Medicine including DOT physicals and Workers Compensation Assessments. The Authority is evaluating the benefits of becoming partially self-funded to assist in reducing costs and generating more business for the Hospital and practice by giving the employees the option to utilize the Hospital. Currently, employees who subscribe to the Hospital's insurance plan have to utilize other lab facilities and pharmacies to obtain in-network benefits.
- (7) The Authority terminated a long-standing contract with their previous pharmacy provider and has hired Pharm D for pharmacy management. They have on behalf of the Hospital, applied for a retail pharmacy license in hopes to increase revenue through a meds to the bed program. They have also applied to participate in the 340B drug program.
- (8) The Authority terminated the Physical Therapy contract and has hired a new provider. Revenue has increased in this department in addition to assisting in growing the swing bed services by providing occupational therapy.

NOTES TO FINANCIAL STATEMENTS, Continued June 30, 2020 and 2019

18. <u>Coronavirus (COVID-19)</u>

COVID-19

As a result of the spread of the COVID-19 coronavirus, economic uncertainties have arisen. The outbreak has put an unprecedented strain on the U.S. healthcare system, disrupted or delayed production and delivery of materials and products in the supply chain, and caused staffing shortages. The extent of the impact of COVID-19 on the Authority's operational and financial performance will depend on certain developments, including the duration and spread of the outbreak, remedial actions and stimulus measures adopted by local, state, and federal governments, and impact on the Authority's patients, employees, and vendors, all of which are uncertain and cannot be predicted. At this point, the extent to which COVID-19 may impact the Authority's financial position or results of operations in uncertain.

19. CARES Act Funding

On March 27, 2020, the Coronavirus, Aid, Relief, and Economic Security Act was passed and on April 24, 2020, the Paycheck Protection Program and Health Care Enhancement Act was passed (collectively, CARES Act). Certain provisions of the CARES Act provide relief funds to healthcare providers. The funding is to be used to support healthcare-related expenses or lost revenue attributable to COVID-19. The U.S. Department of Health and Human Services (HHS) began distributing funds in April 2020 to eligible providers in an effort to provide relief to both providers in areas heavily impacted by COVID-19 and those providers who are struggling to remain open. The Authority has received the following CARES Act funding:

- \$30 Billion General Distribution (1st round) On April 10, 2020, HHS distributed \$30 billion to nearly 320,000 Medicare fee-for-service providers based on their portion of 2019 Medicare fee-for-service payments. The Authority received approximately \$446,000 in funding from this distribution.
- \$10 Billion Rural Distribution On May 6, 2020, HHS distributed \$10 billion to almost 4,000 rural health care providers including hospitals, health clinics, and health centers. The Authority received approximately \$3,360,000 in funding from this distribution.
- \$4.9 Million Georgia Hospital Association Research and Education Foundation, Inc.
 (GHAREF) Grant The Assistant Secretary of Preparedness and Response (ASPR) of
 HHS allocated approximately \$350 million to state hospital associations and other entities
 to disburse to health care providers on the front lines of the COVID-19 pandemic.
 GHAREF received approximately \$4.9 million to disburse to hospitals in Georgia. The
 Authority received and recognized approximately \$5,000 in funding from this grant.
- \$4.9 Million Small Rural Hospital Improvement Program (SHIP) Grant On April 22, 2020, HHS appropriated approximately \$4.9 million to the State of Georgia Department of Community Health, State Office of Rural Health to disburse to 58 rural hospitals in Georgia for the purpose of preventing, preparing for, and responding to COVID-19. The Authority received and recognized approximately \$84,000 in funding from this distribution.

NOTES TO FINANCIAL STATEMENTS, Continued June 30, 2020 and 2019

19. CARES Act Funding, Continued

The CARES Act also did the following:

- Sequestration Suspended the Medicare sequestration payment adjustment, which reduces payments to providers by 2%, for the period May 1, 2020 through March 31, 2021.
- Medicare Add-on for Inpatient Hospital COVID-19 Patients Increased the Medicare payment for hospital patients admitted with COVID-19 by 20%.

The CARES Act funding is reported as unearned revenue until all eligibility requirements are met. Recognized revenue is reported as nonoperating revenues in the statements of revenue, expenses, and changes in net position.

CARES Act funding may be subject to audits. While the Authority currently believes its use of the funds is in compliance with applicable terms and conditions, there is a possibility payments could be recouped based on changes in reporting requirements or audit results.

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

The Board of Directors
Hospital Authority of Clinch County
Homerville, Georgia

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the Hospital Authority of Clinch County (Authority), which comprise the balance sheet as of June 30, 2020, and the related statements of revenues, expenses and changes in net position, and cash flows for the year then ended, and the related notes to the financial statements, and have issued our report thereon dated February 19, 2021.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the Authority's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Authority's internal control. Accordingly, we do not express an opinion on the effectiveness of the Authority's internal control.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that have not been identified. However, as described in the accompanying Schedule of Findings and Responses, we identified certain deficiencies in internal control that we consider to be material weaknesses and significant deficiencies.

Continued

26

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the Authority's financial statements will not be prevented, or detected and corrected on a timely basis. We consider the deficiencies 2020-001 through 2020-003 presented in the accompanying Schedule of Findings and Responses to be material weaknesses.

A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. We consider deficiencies 2020-004 through 2020-005 presented in the accompanying Schedule of Findings and Responses to be significant deficiencies.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Authority's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instance of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Hospital Authority of Clinch County, Georgia's Response to Findings

The Hospital Authority of Clinch County, Georgia's response to the findings identified in our audit are described in the accompanying Schedule of Findings and Responses. The Authority's response was not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Authority's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Authority's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

...

Draffin & Tucker, LLP

Albany, Georgia February 19, 2021

SCHEDULE OF FINDINGS AND RESPONSES June 30, 2020

Material Weakness 2020-001

Condition: Estimates for accounts receivable allowances were calculated based

on outdated percentages rather than current collection history with

consideration for aging which resulted in a significant

understatement. In addition, detailed accounts receivable reports were not ran and maintained for the audit resulting in additional

procedures and difficulty in estimating allowances.

Criteria: Accounts receivable allowances should be based on history and

expectations of reimbursement.

Cause: The allowance methodology currently utilized does not consider

actual reimbursement on existing accounts receivable. Rather, it is based on total outdated percentages, regardless of expected

collections.

Effect: The Authority's financial statements could be materially misstated.

Recommendation: It is recommended that allowances be adjusted according to current

reimbursement percentages based on actual collection history to determine the collectability of the accounts. Also, it is recommended that detailed accounts receivable reports be maintained for accurate

representation of receivables.

Views of Responsible Officials and Planned Corrective Actions:

Subsequent to year end, new accounting personnel was hired. Accounting will develop a formal allowance methodology that includes current collection history and consideration for aging to determine expected accounts receivable collections and adjust the allowance account accordingly. Monthly accounts receivable reports

will be maintained.

SCHEDULE OF FINDINGS AND RESPONSES, Continued June 30, 2020

Material Weakness 2020-002

Condition: Operating cash, inventory, prepaid assets, payroll deductions,

> accrued expenses, as well as other balance sheet accounts were not reconciled timely to supporting documentation. Existing variances on completed reconciliations were not investigated and corrected as

necessary.

Criteria: A process should be in place to ensure all balance sheet accounts

are reconciled completely and on a timely basis allowing adequate

time for review by appropriate personnel.

Cause: Internal controls over reconciliation processes are inadequately

designed.

Effect: The Authority's financial statements could be misstated due to

recording errors not detected in a timely manner.

Recommendation: All balance sheet accounts on the general ledger should be

reconciled to the appropriate subsidiary ledgers and/or supporting documents and all variances investigated on a timely basis. This control activity will help ensure the accurate reporting of the

Authority's financial position and operations.

Views of Responsible Officials and Planned **Corrective Actions:**

Subsequent to year end, new accounting personnel was hired. Accounting will put controls in place to ensure all reconciliations are

performed timely and accounts corrected as needed.

SCHEDULE OF FINDINGS AND RESPONSES, Continued June 30, 2020

Material Weakness 2020-003

Condition: Clinch Memorial Family Practice revenue and corresponding

accounts receivable, contractuals and payments were not recorded

on the Authority's trial balance.

Criteria: A process should be in place to ensure all subsidiary activity is

recorded on the Authority's trial balance.

Cause: Internal controls over subsidiary recording process are inadequately

designed.

Effect: The Authority's financial statements could be misstated due to

recording errors not detected in a timely manner.

Recommendation: A process should be in place to ensure accurate posting and review

of all subsidiary information to the Authority's trial balance. This control activity will help ensure the accurate reporting of the

Authority's financial position and operations.

Views of Responsible Officials and Planned

Officials and Planned Corrective Actions:

Subsequent to year end, new accounting personnel was hired. Accounting will ensure a process is established so that the proper reports are ran monthly and recorded on the Authority's trial balance.

SCHEDULE OF FINDINGS AND RESPONSES, Continued June 30, 2020

Significant Deficiency 2020-004

Condition: Segregation issues were identified related to cash transactions.

Accounting personnel can access funds, post journal entries and reconcile the bank statements. No review of bank reconciliations was

performed as of June 30, 2020.

Criteria: To ensure appropriate reporting and physical safeguard of assets,

certain responsibilities such as authorization, recordkeeping, and custody should be appropriately segregated. In situations where all three elements cannot be adequately segregated, a robust review

process should be implemented.

Cause: Internal controls over the cash process are inadequately designed.

Effect: While no specific misstatements were noted due to segregation

issues, the potential for misappropriation exists when appropriate

safeguards are not in place.

Recommendation: To the extent possible, duties should be segregated to serve as a

check and balance on the employee's integrity and to maintain the best control system possible. We feel segregation could be improved if a different employee performed the bank reconciliation. Further, it is recommended that an additional review process be implemented if

segregation is not possible due to lack of personnel.

Views of Responsible Officials and Planned Corrective Actions: Subsequent to year end, new accounting personnel was hired. Processes will be reviewed and modified to better segregate duties. If duties cannot be segregated, a review process will be put in place.

SCHEDULE OF FINDINGS AND RESPONSES, Continued June 30, 2020

Significant Deficiency 2020-005

Condition: Several issues were noted related to central supply, pharmacy, and

lab inventory including unrecorded inventory, due to no inventory counts being performed at year end. Central Supply did perform the annual inventory count; however, the related adjustment was not

posted.

Criteria: On an annual basis, a physical inventory count should be taken of all

inventory in stock. Once the count is complete, appropriate supervisors should review the count sheets to ensure all extended calculations are accurate and ensure the proper recording in the system. The new count should then be communicated to the

accounting department in order for the appropriate journal entry to be posted to correct the general ledger balance. All inventory,

particularly pharmacy should have safeguards in place to ensure only

the amount ordered is dispensed or removed from storage.

Cause: Internal controls over the inventory process are inadequately

designed.

Effect: The Authority's financial statements could be misstated as it relates

to inventory reported on the balance sheet and supply and drug

expense reported on the income statement.

Recommendation: It is recommended that controls are established to ensure that all

inventory is adequately safeguarded and that processes are put into place to ensure all appropriate inventory is recorded on the general

ledger at the appropriate amounts.

Views of Responsible
Officials and Planned
Corrective Actions:

Subsequent to year end, new accounting personnel was hired. Accounting will ensure a process is established so that inventory counts are performed timely, reviewed, and recorded appropriately on

the Authority's trial balance.
